LOGNOTE - Chief, Operations Group, 6 February 1986

1.  Following are minutes from this morning's staff meeting:

25X1

- D/FBIS announced that the DCI is in Congress today beginning his State of the World report.
- The biweekly with the DDS&T and ADDS&T was held this week with proposals focused primarily on FBIS priorities. Judgment was reserved on the approval of the West Europe Bureau but general support was given to FBIS preliminary efforts to activate such a bureau. The ADDS&T feels that bureau automation is ranked too low among our modernization projects. D/FBIS has directed C/ADD to look into concrete alternatives to the Lockheed proposals for bureau automation and to report on those alternatives by 1 September.
- The DDS&T has instructed all offices in the Directorate to re-examine the FY-88 base activities and to identify reductions to offset new initiatives.
- In a separate discussion on FY-88 new initiatives, it was projected that no more than \$20 million will be available for such activities throughout the Directorate. Thus far, the top-ranked three initiatives from FBIS (Okinawa housing, TV Center, and S&T activities) remain among those expected to be funded.
- On the Reston move: It was announced that by next week FBIS must present a rough idea of how we propose to allocate our space within the new building to individual operations. C/E&PS will be visiting the groups to go over specific space needs and wishes.
- C/AS announced that a schedule of security awareness briefings will be issued soon. People will be identified by alphabet, not component.
